32 YEARS OF EXCELLENCE

DIMPLE home appliances have been delivering high quality products for over 30 years. We achieve this, using our state of the art manufacturing facilities that ensure reliable and durable products . We uphold our promise of creating superior quality products in India for India. CNC programmed Winding & machining stations, double-ended specially toolled-up units for assembly covers and rotorsensures consistency and efficiency .Monitoring through strict quality control norms on conveyor belts for assembly unit & paint shop assures harmonious flow of each piece, delivering consistent high productivity. Deploying professional tech staff at each stage of the assembly process makes **DIMPLE** product on top level of mechanism in fan industry. -Strict checking norms at each & every step of production from initial raw material to packaging makes Dimple no1 product in India.

STATOR SHOP

- State-of-the-art winding process using CNC programmed winding machines.
- Compact & layered coils.
- Hi-tech microprocessor based testing equipment ensure long life of motor winding
- Excellent quality 'Six Sigma'.

MACHINE SHOP

- CNC machine centre, double-ended specially tooled-up for motor end covers and rotors
- High precision & consistency in machine system ensures zero defect.
- On line gauging with automaton for monitoring SPC.
- Higher productivity.

ASSEMBLY

- Conveyorized motor & blade assembly line ensure single piece flow & consistently high productivity.
- Each stage of assembly is equipped with latest technology machines & mechanisms
- Automaton in online packing with latest technology machines for accuracy & productivity.

Paint Shop

- Fully integrated state of the art pre-treatment system & Painting system
- PLC controlled time cycle for transporter movement during pre-treatment process in each tank
- CNG operated ovens for baking ensures high heat transfer efficiency & pollution free environment.

Test & Quality Control

- Latest technology testing equipment & Systems used in process quality assurance.
- Modern testing facilities for motor & blade verification before packing
- Internal product audit system at each stage of manufacturing to enhance customer delight.
- Fully integrated automation system air delivery measurement for ceiling fans
- Modern CNC controlled testing panel to ensure quality and performance of each fan for all required parameters in an acoustic controlled environment.
